Exercise: Box Model

1. Open Notepad and type the following:

```
<!DOCTYPE html>

<head >

<style>
{
font-size:20px;font-family: arial,verdana;
}
// internal style sheet
</style>

</head>

<body>

<h1>Box Model</h1>

<p>In CSS we look at a html element as a box. We can add a
margin, border and padding to a html element</p>

<p id="bord">If you want the padding for the top, bottom, left
and right to be 25px then the code would be written as:
padding:25px</p>

<h2>How to open Notepad</h2>

<ol>
<li> Go to the Start button</li><br>
<li> Click on All Programs</li><br>
<li> Open the Accessories folder</li><br>
<li> Click on Notepad</li>
</ol>

</body>

</html>
```

2. Add the following styles inside the internal style sheet:

    a) Add 30px padding to all the paragraphs

    b) Add 2px solid green border and a 6px solid pink outline border to paragraph 2 - selector: id= "bord"

    c) Add a 10px red dotted border to <h1>header and a left margin of 30px

    d) Add 40px margin to <h2> header

3. Add the following to the order list:

    a) Left and Right :40px padding

    b) Top and Bottom:20px padding

    c) Margin left :50px

    d) Top border :2px dotted blue

    e) Bottom border:4px dotted orange

    f) Left border:3px solid green

    g) Right border: 6px solid red

4. Save the file as boxmodel.html
