

Exercise: Introduction

1. Open Notepad and type the following:

```
<!DOCTYPE html>

<head >

<style>

body
{
font-size:20px;font-family: arial,verdana;
}

#p1
{ ? }

#p2
{ ? }

</style>

</head>

<body>

<h2 style=" ? ">Introduction</h2>

<p style= " ? ">An internal style sheet is on the same page as
the html code.</p>

<p id ="p1"> It is best to use an external style sheet if you
have multiple pages with the same codes.</p>

<p id="p2">The inline style codes go inside the html
element.</p>

</body>

</html>
```

2. Add a green font colour to <h2> header as an inline style
3. Add a red font colour to first <p> paragraph as an inline style
4. Add the following style inside the internal style sheet:
 - a. Add a green font colour to the second paragraph
 - b. Add a blue font colour to the third paragraph
5. Look at the external style link and fill in the blanks.

<link rel=" _____ " type="text/css" href=" _____ "/>

6. Place the link inside the document in the correct area
7. Save the file as introduction.html

Now why don't you add a few more paragraphs and style them using the inline style or the internal style sheet.
