

Exercise 1: HTML5 Semantic Elements

```
<!DOCTYPE html>
<head>
<title>Semantics</title>
</head>

<body>

<header style="background-color:orange;text-align:center">
<br>

<br>
</header>

<br>
<nav>

</nav>
<br>

<section style="border:2px solid black">

<article style="background-color:silver">

</article>
<br>

<article style="background-color:silver">

</article>
<br>
</section>

<footer style="background-color:orange;">

</footer>

</body>
</html>
```

1. Inside the header tags after the break tag
 add the following:
`<h1> Home Baking</h1>`
2. Inside the nav tags add the following:
 - a. `Home`
 - b. `Cakes`
 - c. `Pies`
 - d. `Bread`
3. Inside the section tags add a `<h1>Special Occasions</h1>`
4. Inside the first article add a `<h3>Birthdays</h3>` and inside the second article add a `<h3>Weddings</h3>`
5. Type the following under the heading Birthdays:
`<p>It can be very exciting when it is your birthday.</p>`
6. Type the following lines under the heading Weddings:
`<p>A wedding is a very special occasion. </p>`
7. Inside the footer add the following:
`<h4>copyright 2017</h4>`
8. Save the file as semantics.html
