

# Exercise 3: HTML5 Input Type

1. Open Notepad and type the following:

```
<!DOCTYPE html>
<head>
</head>

<body>

<h1>Input Type</h1>

<form>

Search: // add input type search and the placeholder here

//add input type submit here

<br><br>

Colours: // add input type colors here

<br><br>

Date:// add input type date here

</form>

</body>
</html>
```

2. Inside the form add the following input type:

- a. search and the name="find"
- b. submit and the value="Search"
- c. color and the name="colors"
- d. date and the name="dates"

3. Inside the input type search add placeholder="search"

4. Save the file as inputType.html
