

# Answer 2: Array Object

```
<!DOCTYPE html>
<head>
<script>

var names=new Array("jane","sara","imran","tom","sally");
var ages=new Array("22","19","25","33","31");

document.write("a:" + ages.slice(1,4) + "<br><br>");

document.write("b:" + names.slice( 1 ) + "<br><br>");

document.write("c:" + ages.slice(-1) + "<br><br>");

document.write("d:" + names.slice(0,1) + "<br><br>");

document.write("e:" + " removed " + names.splice(1,1) +
"<br><br>");

document.write("f:" + names.splice(1,0,"linda", "mary") +
" print " + names + "<br><br>");

document.write("g:" + " removed: " + ages.splice(2,2) +
"<br><br>");

document.write("h:" + " sort: " + names.sort() + "<br><br>");

</script>
</head>
<body></body>
</html>
```
