Answer: Boolean Object

```
<!DOCTYPE html>
<head>
<script>
var b1=new Boolean(0);
var b2=new Boolean("false");
var b3=new Boolean("");
var b4=new Boolean(1);
var b5=new Boolean(null);
var b6=new Boolean(NaN);
var b7=new Boolean(false); var b8=new Boolean(-6);

document.write("b1 =" + b1 + "<br><br>");      false

document.write("b2 =" + b2 + "<br><br>");      true

document.write("b3 =" + b3 + "<br><br>");      false

document.write("b4 =" + b4 + "<br><br>");      true

document.write("b5 =" + b5 + "<br><br>");      false

document.write("b6 =" + b6 + "<br><br>");      false

document.write("b7 =" + b7 + "<br><br>");      false

document.write("b8 =" + b8 + "<br><br>");      true

</script>
</head>
<body></body>
<html>
```
