

Answer 1: Date Object

```
<!DOCTYPE html>
<head >

<script>

// new object called today created
var today= new Date();

document.write("The date is:" + today.getDate() + "<br>" );

document.write("The Month is:" + today.getMonth() + "<br>" );

document.write("The Year is:" + today.getFullYear() + "<br>" );

//set the month to december
today.setMonth(11);

//get new month
document.write("New month is:" + today.getMonth() + "<br>")

</script>

</head>
<body></body>
</html>
```
