Exercise 1: Event Handlers

1. Open Notepad and type the following script:

```html
<!DOCTYPE html>
<head >

<script>

function Calculate()

{
var num1=6;
var num2=5;

alert("Answer=" + num1*num2);

}

</script>

</head>

< body>

<form name="cal">

<h3> What is 6x5?</h3>

<input type="button" onclick="Calculate()"
value="Calculate" />

</form>

</body>

<html>
```
