Exercise 1: Event Handlers

1. Open Notepad and type the following script:

```
<!DOCTYPE html>
<head >
<script>

function calculate()
{
var num1=6;
var num2=5;

code for alert message goes in here
}
< /script>

< body>
<form name="cal">
<h2> What is 6x5?</h2>

code for button goes here
</form>
</body>
</head>
<html>
```

2. Inside the <script></script> tags write the code for an alert
   message , which displays the Answer for num1 x num2

3. Inside the <body></body> tags create an input button when
   clicked shows the alert message

4. Save the document as event.html
