Answer 2: Functions

1. Open Notepad and type the following:

```
<!DOCTYPE html>

<head>

<script>

function total()

{

var num1="62";

var num2="10.5";

var num3=4.5;

var total=parseInt(num1)+parseFloat(num2)+num3;

alert(" The total is: "  + total)
}

</script>

</head>

<body>

<form name="t" >

<input type="button" value="Total" onClick="total()"/>

</form>

</body>

</html>
```
