

Answer 3: Functions

1. Look at the following two scripts and fill in the blanks.

Script 1

```
<script>

function areaOfRectangle()
{
var length=6;
var height=6;
document.write("area of a rectangle is:" +
(length*height)+"cm");
}
</script>
```

Script 2

```
<script>

function sum()
{
var a="7.2__";

var b=9;
var c="24";

document.write("String: " + c + b);

document.write("Number: " + (parseFloat(a) + b));

document.write("Result:"+(parseInt("24")+20))
}
</script>
```
