

Answer : Introduction

```
<!DOCTYPE html>

<head>

// This is a Javascript External file

<script type="text/javascript" src="home.js"> </script>

<script>

// This script is inside the head section

document.write("Welcome to Javascript")

</script>

</head>

<body>

<script>

// This is an Inline script

document.write("Welcome to Javascript")

</script>

</body>

</html>
```
