Answer 1: Number Object

```
<head>

<script>

var num1=125;
var num2=83;
var num3=789.1287;
var num4=1234.30

document.write("a. Hex is:" +  num1.toString(16) +
"<br><br>");

document.write("a. Binary is:" +  num2.toString(2) +
"<br><br>");

document.write("c. Fixed point:"  + num3.toFixed(2)
+"<br><br>");

document.write("d. Significant digit:" +  num3.toPrecision(3)
+"<br><br>");

document.write("e. Exponential:" + num4.toExponential(3)
+"<br><br>")

</script>

</head>
```
