

Answer 3: Objects

```
<!DOCTYPE html>

<head>

<script>

function Student(name,id)
{
this.name=name;
this.id=id;
}

s1=new Student("Sue",3456)

Student.prototype.enrolement=function(){
return "You have enrolled on the course successfully"}

document.write("Name: " + s1.name + "<br>")

document.write("ID: " + s1.id + "<br>")

document.write("Enrolement:" + s1.enrolement() + "<br>")

</script>

</head>

<body></body>

</html>
```
