

Exercise 2:

Assignment Operators

1. Fill in the empty cells in the table below and find the new value for x using the following values:

$$x=20 \quad y=4$$

Operator	Example	Means	Answer
+=	x+=y		
-=		x=x-y	
/=			
*=			
%=			0

2. Write the correct answer next to ans.

```
<script>
var x=11; y=3; z=12;
document.write("Answer=" + (x%=y));           ans=
document.write("Answer=" + (z/=y));           ans=
</script>
```
