

Answer 2: String Object

```
<!DOCTYPE html>
<head >

<script>

var numbers="3,4,5,7,5,8"
var num1="45434";
var num2="6745";
var num3="9878";
var num4;

document.write("concat:" + (num4=num1.concat(num2, num3)) +
"<br><br>");
document.write ("replace:" +num4.replace(/4/g,1)+"<br><br>")

document.write("indexOf:" + num3.indexOf(8) + "<br><br>");

document.write("lastIndexOf:" + num3.lastIndexOf(8) +
"<br><br>");

document.write("split:"+ numbers.split(", ", 3) +"<br><br>");

document.write("match:"+ numbers.match(/5/g)+"<br><br>");
</script>
</head>
<body>
</body>
<html>
```
