

Answer 1: Variables

```
<!DOCTYPE html>

<head >

<script>

var total;

function buying()
{

var price=8;
var qty=6;

alert("The total cost of the books is: £" +

(total= price*qty));

}

</script>

</head>

<body>

<input type="button" value="Total" onclick="buying()"/>

</body>

<html>
```
