Answer 2: Variables

```
<head>

<script>

var digitString="33";
var numberWhole=16;
var numberFloat= 12.4;
var numString="45.6";

document.write("a.Answer=" + (digitString+numberWhole) +
"<br><br>");

document.write("b.Answer=" + (parseInt(digitString) +
numberWhole) +"<br><br>");

document.write("c.Answer=" +
(numString+numberFloat)+"<br><br>");

document.write("d.Answer=" + (parseFloat(numString) +
numberFloat)+ "<br><br>");

document.write("e.Answer=" + (digitString+numString) +
"<br><br>");

document.write("f.Answer=" + (digitString + numberFloat)
+"<br><br>");

document.write("g.Answer=" +
(numString+numberWhole)+"<br><br>");
</script>

</head>
```
