

Answer 1: Window Object

1. Open Notepad and type the following:

```
<!DOCTYPE html>
<head>

<script>

var num1, num2

function addition()
{
num1=5; num2=23;
window.alert("Answer= "+(num1+num2))
}

function division()
{
num1=40; num2=10;
window.alert("Answer= "+ (num1/num2))
}

function multiplication()
{
num1=12; num2=6;
window.alert("Answer= "+ (num1*num2))
}

</script>

</head>

<body>

<form>
<input type="button" value="Addition" onclick="addition()"/>
<input type="button" value="Division" onclick="division()"/>
<input type="button" value="Multiply"
onclick="multiplication()"/>
</form>

</body>

<html>
```
