

Answer 4: Window Object

1. Look at the document below and fill in the blanks

```
<!DOCTYPE html>
<head>

<script>

/*displays the URL of the document that is currently loaded in
the browser window*/

document.write(location.href + "<br><br>");

//displays the appName

document.write(navigator.appName + "<br><br>");

//screen available width and height

var w=window.screen.availWidth;

var h=window.screen.availHeight;

document.write("screen available width:"+ w + "<br><br>");

document.write("screen available height:"+ h + "<br><br>");

</script>

</head>

<body>

<form>

<input type="button" value="Back" onclick="history.back();" />
</form>

</body>

<html>
```
