

Exercise 2: Window Object

1. Open Notepad and type the following:

```
<!DOCTYPE html>
<head>
<script>
function multiply()
{

//prompt goes here ("What is 6 x 6 ?", " ");

if (ans==36)
{
document.write("<h2>Well done!</h2>");
}
else
{
document.write("<h2>Sorry wrong answer!</h2>")
}
}
</script>

<form>

//input button goes here

</form>

</body>

<html>
```

2. Insert the prompt "ans=prompt" in the correct place in the above document
3. Inside the form, add an input button with the value="Answer" and an onclick= "multiply()"
4. Save the file as winPrompt.html
