

# Exercise 3: Window Object

1. Spot and correct the coding errors in the document below

```
<!DOCTYPE html>

<head>

<script>

function text()
{
document.getElementById(" ").innerHTML="Font Colour";

document.getElementById("p1").      ="The header font colour is
red";

document.getByElementBy ("p2").innerHTML="This is the 2nd
paragraph";
}

</script>
</head>

<body>

<h2 id="h" style="color:red"></h2>

<p id="p1"></p>

<p id=" "></p>

<input type="button" value="click me" onclick="  () "/>

</body>

</html>
```

2. Once the document has been corrected, open Notepad and type the above.

3. Save the file as winDocId.html
